

DESERT STARS *Species may vary*

Place in bright indirect light or a space that receives a few hours of morning sun. Check the soil for dampness once a week. If dry, add about a quarter of a cup of water, keeping in mind that any excess will build up in the bottom and should be avoided. Water should be applied to the soil, not to the plant itself. Makes a perfect gift!

GEOGRAPHIC ORIGIN:

Africa & the Americas

GREAT FOR: Bright Sunlight**FEATURES:**

Low Maintenance

GROWTH RATE: Slow**LIGHT**

Place in bright indirect light or a space that receives a few hours of morning sun. In hot summers, more shade may be necessary.

**WATER**

Check the soil for dampness once every week. If dry, add about a quarter cup of water. Any excess will build up in the bottom and should be avoided.

**DIFFICULTY**

Easy! Just check the soil for dryness weekly and avoid too much direct sunlight.

**TEMPERATURE**

Normal household temperatures 60-80°F are best.

**FERTILIZER**

Feed with a mild cactus fertilizer about once a month during the growing season. Do not fertilize in winter.

**SOIL**

When repotting the succulents, use a well-draining Cacti/Succulent Potting Mix for best results.

**PRUNING & PROPAGATION**

Prune damaged areas by cutting to the stem. To propagate, plant cuttings in soil.

**PET FRIENDLY?**

Sorry! While some succulents are non-toxic if consumed by pets, others can be mildly toxic.
