

## DRACAENA LIMELIGHT *Dracaena deremensis*

The Dracaena Limelight is a low-maintenance evergreen that tolerates a wide range of growing conditions. Featuring bright, chartreuse-green leaves, the Dracaena Limelight is a bold houseplant in spaces where natural sunlight may be limited. The Dracaena Limelight is especially good at removing formaldehyde and other toxins from the air.

### GEOGRAPHIC ORIGIN:

Tropical Africa

### GREAT FOR: Low Sunlight

### FEATURES:

Low-maintenance

### GROWTH RATE: Slow

### LIGHT

Medium, indirect sunlight is best but can tolerate low light as well. New growth may be smaller in low light. Avoid direct sunlight.

### DIFFICULTY

Easy! Just avoid direct sun and don't overwater.

### FERTILIZER

Feed with a liquid, indoor plant fertilizer about once a month during the growing season. Do not fertilize in winter.

### PRUNING & PROPAGATION

Prune top foliage to maintain desired height. Can cut tall stalks and new growth will appear near the cut. Major cuts in early spring. Trim brown tips with wet scissors. To propagate, use rooting hormone on stem cuttings in summer.

### WATER

Allow soil to mostly dry out, and water less often in winter. Water less if in low light. If brown tips occur on foliage, try filtered/distilled water.

### TEMPERATURE

Tolerates a wide range of temperatures, but prefers 60-85°F. Keep away from drafty windows and air conditioners.

### SOIL

Use a well-draining, All-Purpose potting soil. Can mix soil with lava rocks to improve drainage.

### PET FRIENDLY?

Sorry! Mildly toxic if consumed.
