

## ZZ PLANT *Zamioculcas zamiifolia*

The ZZ Plant is a low-maintenance tropical plant in the Araceae family with waxy foliage. New growth is a bright, chartreuse green that gradually darkens as the plant matures. Tolerating a wide range of environmental conditions, the ZZ Plant is perfect for spaces where natural sunlight may be limited.

**GEOGRAPHIC ORIGIN:**  
Eastern & Southern Africa

**GREAT FOR:** Low Sunlight

**FEATURES:**  
Low Maintenance

**GROWTH RATE:** Slow

### LIGHT

Prefers bright, indirect light but can tolerate low light as well. Avoid direct sunlight.

### WATER

About once every 10-14 days. Allow soil to dry out completely and water less often in winter.

### DIFFICULTY

Easy! Just avoid direct sunlight and don't overwater.

### TEMPERATURE

Prefers warm conditions above 60°F. Warm temperatures improve leaf production. Keep away from drafty windows and air conditioners.

### FERTILIZER

Feed with a mild liquid, indoor plant fertilizer about 1-2 times a month during the growing season. Do not fertilize in winter.

### SOIL

A peaty All-Purpose potting soil with good drainage works best.

### PRUNING & PROPAGATION

Prune yellow or damaged stems down to soil level. To propagate, large plants can be divided.

### PET FRIENDLY?

Sorry! All parts of the plant are considered mildly toxic if consumed.
